

Date:
17th January 2012

This event is CPD accredited

Speaker:
Gerry Pennell

In his speech to The Chemistry Club, Gerry Pennell, CIO, London 2012, talked about the technology integration, distribution, modelling and security involved in planning for the Games. In a very lively question and answer session Gerry discussed, amongst other things, the security measures and co-ordination of LOCOG staff during the parallel sporting events and preparations for the widespread use of new consumer technologies, a stark difference to previous Games, and the relevance of London 2012 to all London IT professionals.

Attendees:
